

# **IRAQI JOURNAL OF APPLIED PHYSICS**

## **Volume (14), Issue (2), April – June 2018**

### **CONTENTS**

|                                                                                                                                                                                                            |       |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|
| Instructions to Authors                                                                                                                                                                                    | 2     |
| Advanced Laser Diagnostics for Non-Equilibrium Plasma Assisted Combustion Kinetics<br>A. El-Mahdi, I. bin Selima, R. Fortier                                                                               | 3-10  |
| Investigation of Bound and Free Surface Waves in Microwave and Acoustic Wind-Wave Tank Systems<br>K.S. Jameel, G. Ibeshiyv, L.K. Parshieva, P.J. Vodesko                                                   | 11-18 |
| Development of UV Raman LIDAR System to Measure Temperature and Water Vapour Profiles in Troposphere Layer<br>M. Kabral, S. Patel, R. Chandrakar, M. Kapur Sing, S. Agrawal                                | 19-26 |
| New Algorithm for High Throughput of IEEE 802.11 Distributed Coordination Function<br>S.H. Abdulhussain, D.J. Kadhim, B.M. Ridha, A.M. Abbas                                                               | 27-34 |
| Numerical Analysis of Temperature Dependencies of Optical Elasticity Coefficient on Lens Induced in Solid-State Laser Crystal<br>H.M. Majeed, R.A. Jassim, A.J. Kadhim                                     | 35-42 |
| Femtosecond Ti:sapphire Laser Pulses to Deposit Precious Metal Nanoparticles on Crystalline and Amorphous Titanium Dioxide Films<br>A. Aiboushev, A. Astafiev, Y.E. Lozovik, V. Nadtochenko, O.M. Sarkisov | 43-48 |
| Iraqi Journal of Applied Physics (IJAP) Copyright Form                                                                                                                                                     | 49    |
| Contents                                                                                                                                                                                                   | 50    |
