| About Iraqi Journal of Applied Physics (IJAP)                                                                                                                                                                                                                          | 1     |
| Instructions to Authors                                                                                                                                                                                                                                                | 2     |
| IJAP in 19 year                                                                                                                                                                                                                                                        | 3-4   |
| Characterization of Electrochromism and Photoelectrochromism of N-Doped TiO <sub>2</sub> and Co <sub>3</sub> O <sub>4</sub> Thin Films Prepared by DC Reactive Magnetron Sputtering: Comparative Study<br>Noor Alhuda H. Hashim, Firas J. Kadhim, Zinah S. Abdulsattar | 5-12  |
| Isolation of Fungi from Petroleum-Contaminated Soil and Evaluation of Their Ability to Degrade Crude Oil<br>Mohammed Y. Khdiar, Atheer A. Mahmood, Liwaa A. Shihab, Giles E. St. J. Hardy                                                                              | 13-20 |
| Comparative Study of Gamma and Beta Rays Exposure Effects on Manganese Sulphide Thin Films for Solar Cell Applications<br>Rawaa E. Mohammed, Issam M. Ibrahim, Akram M. Ali                                                                                            | 21-28 |
| Investigation of Some Structural and Optical Properties of PMMA-PVA/PDA Nanocomposites<br>Hiba S. Rasheed                                                                                                                                                              | 29-34 |
| Synthesis of NAC-CdTe/CdS Core-Shell Quantum Dots for Optical Biosensing Applications<br>Eman A. Fadhil, Manal M. Abdullah, Fadhel M. Lafta                                                                                                                            | 35-40 |
| Comparative Analytical Study of Some Stainless Steels Using LIBS, XRD, XRF and EDS Techniques<br>Hyder A. Salih, Qusay A. Abbas, Khaleel I. Hassoon                                                                                                                    | 41-46 |
| Iraqi Journal of Applied Physics Letters (IJAPLett) returns back again                                                                                                                                                                                                 | 47    |
| Contents                                                                                                                                                                                                                                                               | 48    |
